Designed for Accuracy

- High speed processing of ballots
- Captures ballot images and extracts write-in images from ballots
- Provides single pass scanning for fast and accurate ballot reads
- Captures write-in images in both color, and black and white
- Uploads results directly to the OpenElect Central Suite (OCS) Tabulator

Designed for High Speed, Secure Scanning

- Capable of scanning 150 ballots per minute
- Flexibility to read various ballot sizes
- Extracts write-in entries from ballots and presents consolidated reports for each contest

Features of the OVCS:

- High levels of physical security and encryption
- Transparent system which supports accountability
- Accommodates Ranked Choice Voting (RCV)
- Provides a permanent record of voter choices
- Captures and stores full ballot images
- The Auditor Functionality allows electronic review and editing with extensive Audit Log display and Reporting

Unisyn Voting Solutions, Inc., provides secure election solutions to public and private voting entities.

Unisyn products provide a wide array of choices in selecting a voting system.
